

Complete Communications helps Large Corporation Determine Best Carrier for Large Multi-Site Solution with Fiber Tools

The Challenge

Large Multi-National corporation with over 1200 locations was seeking to deploy SD-WAN. Customer did not have the resources nor the expertise to determine which provider could deliver the best service, support, install times and the most aggressive price point. With circuit selection being critical to a successful SD-WAN deployment, customer turned to Complete Communications to help them overcome this challenge.

Complete Communications Solution

By leveraging the Complete Communications team of experts, the customer was able to dramatically reduce time frames to build the carrier architecture. Complete Communications was able to deliver a full-blown carrier assessment addressing diversification requirements, bandwidth speeds, at the best overall price point. Complete Communications did all the heavy lifting for the customer including project managing the entire solution.

Solution Features & Benefits

-  Fiber locating tools to help determine the best carrier at each location, from a pricing standpoint, as well as building last-mile diversity for redundancy and maximum up-time
-  Team of experts that globally source circuits all day every day
-  Ability to free up resources on customer's end for technical solutions and more important tasks
-  Free to the customer. Carriers pay Complete Communications an outsourced project management fee
